

Call for **Special Sessions**

20th International Conference on Remote Engineering and Virtual Instrumentation (REV2023)

"Open Science in Engineering"

Porto Palace Hotel*, Thessaloniki, Greece, **1-3 March 2023**

(online presentations will be supported)

<http://www.rev-conference.org/>

Special sessions, held in parallel with the general conference, are an integral part of the conference. They provide researchers in focused areas the opportunity to meet and present their work, and offer a forum for interaction among the broader community of technology-enhanced learning, and online engineering world-wide. Special sessions papers are required to meet the same standards as papers in the general conference and are published in the same conference proceedings.

Topics of interest are in all areas of mobile learning and similar to main conference topics.

Proposals must be submitted to **REV** submission server (<https://www.conftool.com/rev-conference>). Special Session papers will be reviewed by at least two members of the special session's program committee, and acceptance decisions will be made by the conference program co-chairs and Special Sessions Chair. Organizers of special sessions will work closely with the Special Sessions Chair (Prof. **Andreas Pester**, andreas.pesther@bue.edu.eg), and are expected to respond promptly and communicate regularly in order to maximize the potential impact of the track. Proposals must be made using the **special session proposal template** (including the necessary information, such as title, organizer(s), special session's program committee, etc.), which is available at the conference website¹. If the proposal will be accepted, it will be used as basis for the call for special session papers.

A special session will include at least **5 papers** and the review process is under the responsibility of the person organizing the special session (i.e., session chair). In that case we offer a **390 euros** discount in the registration fee to **one** special session chair. Special session that fails to attract enough papers will be merged into the general conference or suitable alternative session.

Important Dates:

19 Sep 2022	Submission of Special Session proposals
26 Sep 2022	Special Sessions notification and announcement
24 Oct 2022	Submission of complete papers for all special sessions
05 Dec 2022	Notification of acceptance
07 Jan 2023	Camera-ready due & Author registration deadline
01 Mar 2023	Conference opening
